

THE URV VALORIZATION AND COMMERCIALIZATION UNIT

The Technology Transfer and Innovation Center is the **URV Valorization and Commercialization Unit (UV-URV)** and is part of the Network of Valorization Units of ACCIÓ.

The UV-URV commercializes the industrial and intellectual property of the URV by protecting and valorizing its assets so that they can be licensed or spin-offs created.

INTELLECTUAL PROPERTY (IP)

Since its creation in 2000, the CTTi manages the protection of knowledge derived from the URV's research. The Industrial and Intellectual Property area (IP) is responsible for presenting and monitoring patent applications to the Spanish Patent and Trademark Office (OEPM), the European Patent Office (EPO) and for filing PCT international protection applications, deposits to the Benelux Office for Intellectual Property (BOIP) of works and computer programs, and other related actions, such as the management of license agreements and the monitoring of license returns.

Its main objectives are to sensitize the URV community, to monitor RDI activities and to identify those results that can be protected and transferred to society through licensing or the creation of a spin-off.

ENTREPRENEURSHIP

The URV's entrepreneurship promotion activities are carried out through the Entrepreneurship Area of the CTTi of the FURV (UV-URV) and the Chair on Entrepreneurship furtherance and Company Creation.

The UV-URV directly manages the creation of Spin-off companies as direct exploitation of patents and university knowledge by the researchers or students themselves within the framework of the Regulations for the creation of companies in the URV environment.

On the other hand, innovative companies led by URV alumni can achieve recognition as URV Start-up. This distinctive seal is awarded to those applicant projects that demonstrate that they have been founded during the last three years and that the Entrepreneurship Chair values them as technically and economically solvent, with the aim of providing support (especially communicative) to incipient business projects in the territory.

The new Start-ups recognized by the URV during 2020 are the following:

INDICATORS (IP AND ENTREPRENEURSHIP)

46	INVENTION COMMUNICATIONS	13	LICENSE AGREEMENTS	17	ENTREPRENEURIAL PEOPLE ADVISED BY THE UV-URV
12	PRIORITY PATENT APPLICATIONS	9	PI REGISTRATIONS/SAFE CREATIVE	48,823 €	ROYALTIES
25	INTERNATIONAL PATENT APPLICATIONS ON BEHALF OF THE URV (PCT, EXTENSIONS...)	4	START-UP RECOGNIZED BY THE URV		

URV TECHNOLOGY AND KNOWLEDGE

The URV's technology and knowledge is made available to society through the INNOGET platform. The main objective of this platform is to nationally and internationally disseminate the supply of technology generated by companies and research organizations and connect it with the demand for RDI technologies and services.

More information: <https://fundacio-urv-technologytransfer.innoget.com>

The skills and services offered by the URV research groups can be found in the Catalogue of the Scientific and Technical Services of the URV, which can be consulted on the FURV website.

URV FOUNDATION TECHNOLOGY AND INNOVATION TRANSFER CENTER ACTIVITY OVERVIEW 2020

I am pleased to present you the 2020 Activity Report of the Technology and Innovation transfer center (CTTi) of the URV Foundation (FURV). Created in 1999 by the Rovira i Virgili University (URV), our main objective is to satisfy, from the university level, the technological and services needs generated by the productive sectors and by the administration, through the transfer of technology and innovation, the management of industrial and intellectual property, technological watch, entrepreneurship and supply infrastructure transfer (through the CTTi incubator and other URV spaces).

As in all sectors of activity, the year 2020 has been marked by the impact of the pandemic due to Covid-19. The FURV implemented remote work from the start of the alarm state and, despite the initial complication in setting up the necessary tools, the staff and the activity carried out by the FURV have been able to adapt to the new situation.

This year, the overall contracting volume has been **€ 5,046,860**. This amount includes all the activity of the CTTi: RDI contracts, technical advice and assistance, grants and donations, the activity of the URV Divulga division, the sale of wine from the Mas dels Freres experimental winery, the activity of the CTTi, the income from royalties and the contracting derived from the assignment of spaces and the order of management of the URV buildings.

From the Valuation Unit, 12 priority patent applications and 13 license agreements has been managed and 4 Start-ups have been recognized. These numbers entail a growth compared to 2019, and in a difficult year, marked by Covid-19, it evidence a consolidation of the activity carried out and that has been possible thanks to the aid received in 2018 by the European Regional Development Fund (FEDER), together with the Directorate-General for Research of the Generalitat de Catalunya, supporting the activities

developed by the CTTi to promote the transfer of technology and innovation and the valorisation and commercialization of technologies.

During this year, and for the third time, we have again called for grants for the valorisation of knowledge, Research to Business (R2B). In the call, which has € 80,000 and is co-financed with FEDER aid, 21 proposals were submitted (50% more than the previous year), of which 7 were funded.

We highlight the relationship with the Clusters, in which we participate on behalf of the URV. Last year we actively participated in 3: the **INNOVI Cluster** of the wine sector, the **Food Service Cluster**, which promotes the competitiveness of the foodservice segment and the **TIC Cluster Southern Catalonia** of the information and communication technologies sector of Reus and Camp de Tarragona.

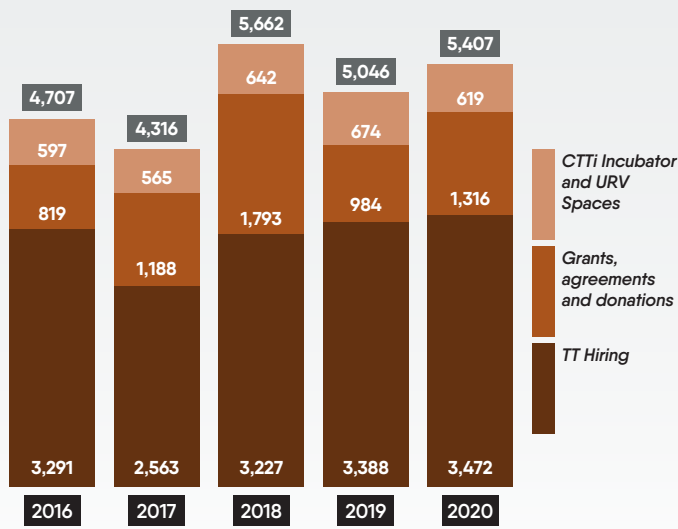

I want to thank everyone who have participated in the activities and the results that are presented: employers, researchers, companies, entities and the entire CTTi team.

Lourdes Jané.
URV Foundation Director

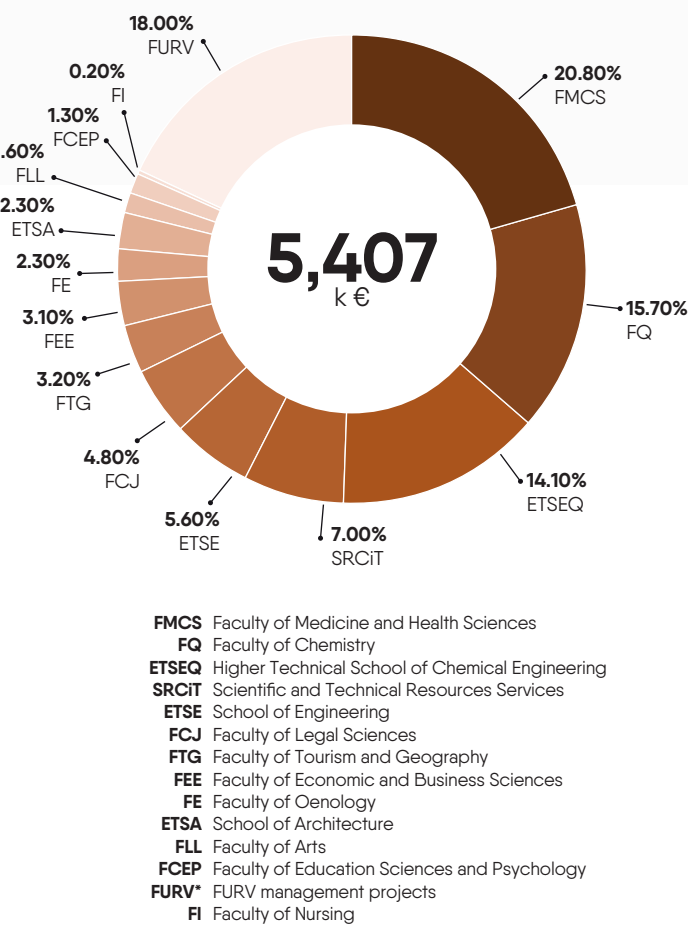

CONTRACTING OF TECHNOLOGY AND KNOWLEDGE TRANSFER

EVOLUTION OF CONTRACTING AMOUNT (k€)

CONTRACTING BY CENTER

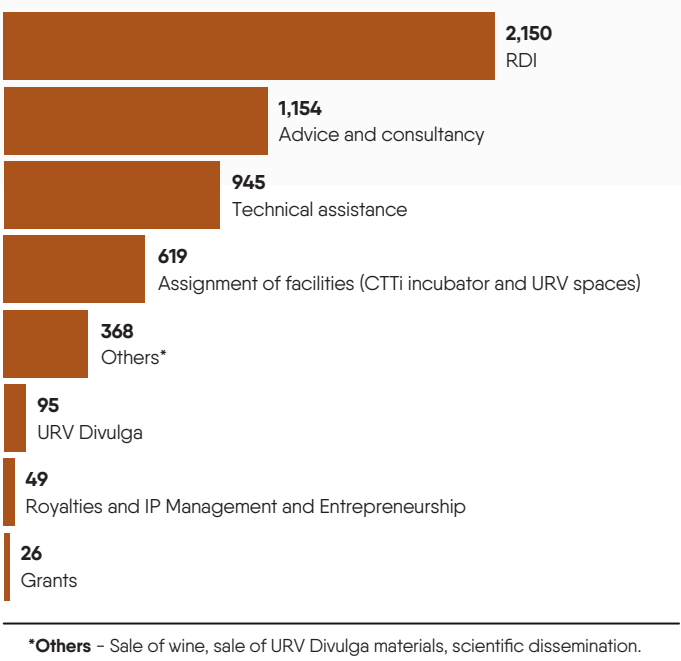

*FURV – Includes URV projects managed by the FURV-CTTi (Tarragona Region of Knowledge, licenses and royalties), CTTi's own projects and space management (CTTi incubator and URV spaces).

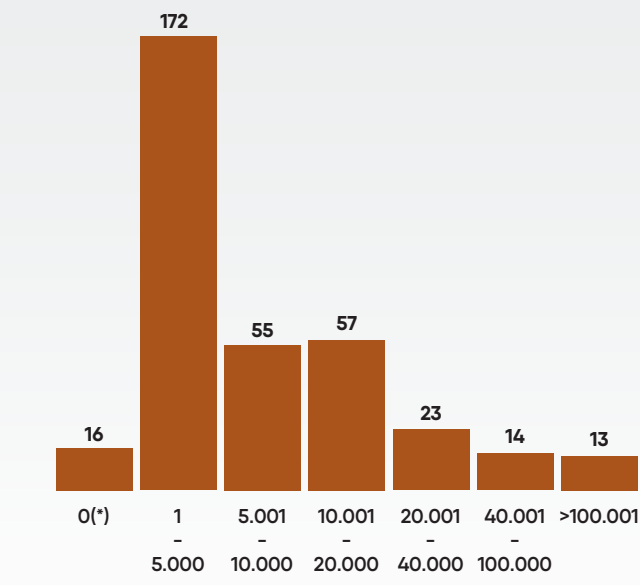

ACTIVITY OF THE CTTi IN 2020

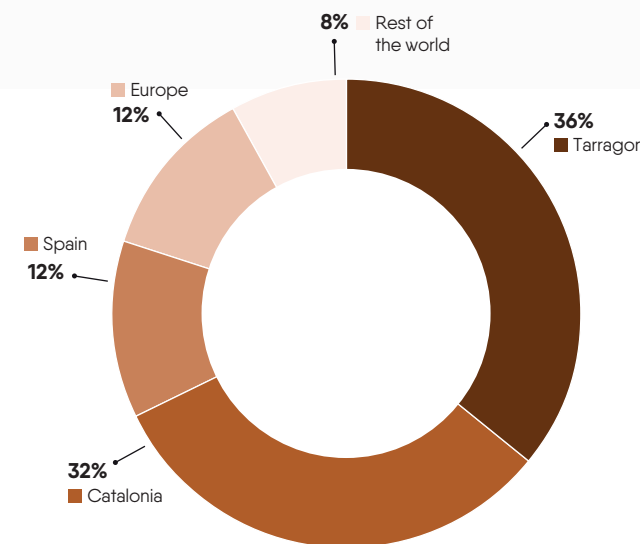

CONTRACTED AMOUNT BY TYPE OF PROJECT (k€)

DISTRIBUTION OF PROJECTS BY CONTRACTED AMOUNT (€)

CONTRACTING AMOUNT BY GEOGRAPHICAL ORIGIN

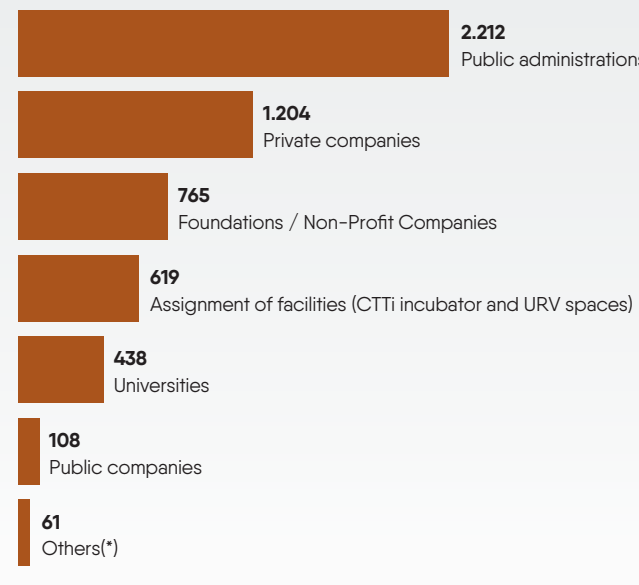

GRANTS (I)

In 2020, a total of **41 grants** were received from the public administration and private companies, with a total contracted amount of **€ 1,264 thousand**, among which we can highlight the following:

- LLAV00061 – TECNANO – Tecnología innovativa para la determinación in situ de nano y micro-plásticos
- PRODO0113 – INSPECTION – Detección in situ de contaminantes en continuo
- LLAV00062 – Introducción de Fluor – Desarrollo de nuevos métodos para introducir modificaciones fluoradas para aumentar la actividad farmacológica de principios activos
- RTC2019-007026-1 Determinación de potasio capil-lar con corrección de hemo-globina para el seguimiento de la enfermedad renal crónica (ERKSENS). Convocatoria Retos Colaboración del Ministerio de Ciencia e Innovación. Eliminación de bacterias en conductos de aire acondicionado (BIODUCT). Convocatoria INNOTEC d'ACCIO
- Projects financed by the DIPUTACIÓ DE TARRAGONA:
 - Asesoramiento, formación y difusión para la creación de empresas en el territorio.
 - Formación, difusión y fomento de la innovación para el tejido empresarial del territorio.

CONTRACTED AMOUNT BY TYPE OF ENTITY (k €)

GRANTS (II)

- Formación de especialistas sanitarios. Programa TALENT-SALUT URV – díptero (2ª anualidad).

- Cine en los pueblos. La Ribera d'Ebre.

- La vulnerabilidad (riesgo) turística en la Costa Dorada y las Terres de l'Ebre a raíz de la Covid-19. Factores de incidencia y aprendizajes para el futuro.

- L'ASSUT (Tivenys, Baix Ebre). Socialización de un patrimonio arqueológico.

- La competencia digital ciudadana. Hacia una brecha digital 0. Creación y formación de comunidades de práctica. Terres de l'Ebre.

- URV Divulga.

- Biopsia, levantamiento etnográfico-arquitectónico turístico de la Costa Dorada después del Coronavirus. Una aproximación al turismo en la desglobalización.

- Identificación de los conectores ecológicos montaña-llanura-litoral en la demarcación de Tarragona.

- WELL-BEING TOURISM. Co-creación de experiencias turísticas.

- Desarrollo de aguardientes de frutas procedentes de excedentes de fruta y envejecidos de forma acelerada.

- La biomasa lignocelulósica: una alternativa a las fuentes petroquímicas. Base para biorrefinerías locales en municipios con recursos forestales.

- Informes y propuestas sobre sistemas de gobernanza para la Región del Conocimiento Cataluña Sur.

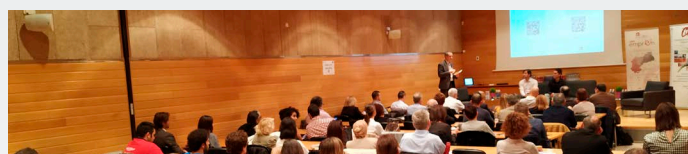

- Análisis integral de las políticas de vivienda en la Cataluña Sur.

- El sector de la hostelería y adaptación a la era post-Covid-19 en la Costa Dorada: análisis territorial en temas de ventilación y climatización de los establecimientos.

- TECSPR19-1-0022 Mitigation of gestational diabetes: a Mobile APP. Convocatoria Tecniospring.
- Call R2B2020 financed 50% with funds from the URV (Vice-Rectorate for Innovation and Knowledge Transfer and Social Council) and 50% with funds from the FEDER Operational Program of Catalonia 2014-2020 within the framework of order EMC/348/2016 of 27 December from the European Regional Development Fund (FEDER) to carry out projects of the recovery and knowledge transfer units of the universities of Catalonia. In the 2020 call, the following projects have been approved:
 - R2B2020/01 Dispositivo de electrodo para electroencefalografía de amplitud integrada.
 - R2B2020/02 Valorización de sistema de comunicación vehículo a radar e infraestructura a radar.
 - R2B2020/03 Diseño y comercialización de un Certificado de buena gestión de vivienda social.
 - R2B2020/04 Herramienta tecnológica para el desarrollo de cuestionarios de evaluación educativa con auto-corrección y feedback inmediato.
 - R2B2020/05 Sensores para el análisis rápido del perfil nutricional de la leche materna.
 - R2B2020/09 Desarrollo de un kit de reactivos para la elaboración de nuevos fármacos.
 - R2B2020/19 3L: Responding to urgent and growing social needs through a novel platform for Telemedicine.

OTHER ACTIVITIES

BUSINESS INCUBATOR AND ASSIGNMENT OF FACILITIES

The Technology and Innovation Transfer Center has offices and laboratories to house the spin-offs that are generated by the URV and those companies that wish to outsource RDI activities and need demonstration facilities and pilot plants. The laboratories are designed to offer maximum flexibility and aim to satisfy a wide range of needs.

The offices are fully equipped and have as access to caretakers, meeting rooms, photocopiers and printers, and space for presentations.

There are also two multimedia rooms and an auditorium equipped for courses, seminars, commercial presentations and other activities.

More information: www.fundacio.urv.cat/ca/fundacio/reserva-aules/index/

COMMUNICATION AND DISSEMINATION ACTIVITIES

The **CTTi Newsletter** is published and emailed monthly. It includes the calls for funding, proposals and requests for business projects, announcements of fairs and technology days, as well as any other activity, regulations, etc. that may be of interest.

The subscription can be made from the Newsletter itself. **More information:** www.fundacio.urv.cat/ca/transferencia-tecnologia/butlleti/subscripcio/

CALIDAD

In May 2020, the CTTi successfully passed the audit of the Quality Management System in accordance with **ISO 9001:2015**. The benefits of implementing a Quality Management System are as follows:

- Plan, organize, systematize and control the activities of the CTTi.
- Establish goals and milestones that help control the resources associated with these activities.
- Provide added value through the management system facilitating the transfer of technology and knowledge.
- To improve the business image of the CTTi and its competitiveness in the face of the socio-economic fabric as a whole.
- Ensure the transparency of technical and economic management in the public administration and other bodies.

Every year the CTTi collects the opinions of internal (PDI) and external customers (companies and other entities), as well as its own staff, so that it can continue to guarantee an optimal management service that responds to the demands and expectations of clients and continuously improves the services it offers.

Contact address qualitat.ctti@fundacio.urv.cat

TRANSPARENCY

Following the approval of Law 19/2013 on transparency, access to public information and good governance, of December 9, and Law 19/2014 on Transparency, Access to Public Information and Good Government, of December 29, in September 2015 the FURV launched its **Transparency Portal**. The content of the portal is updated periodically to comply with current legislation.

More information: www.fundacio.urv.cat/ca/fundacio/transparencia/

CORPORATE COMPLIANCE

During 2020, the FURV has consolidated the crime prevention plan through a regulatory compliance model (Corporate Compliance Program), the activation of a complaints channel, to comply with transparency with current legislation, and the commissioning of a communication channel, a broadcasting channel by FURV departments where the crimes that apply to each functional area and workplace as well as regulatory or procedural changes are periodically reported.
